

The Foundry Roundup

MAY, 1961

When the Interest Came Due He Remembered the Principal!

(Editor's Note: The following article has been printed in several company magazines, and has been entered in the Congressional Record by one Congressman. With thanks to whomever was the originator of these remarks, we reprint them here for your reading.)

A YOUNG MAN lived with his parents in a public housing development. He attended public school, rode the free school bus, and participated in the free lunch program. He entered the Army, and then upon discharge retained his national service insurance. He then enrolled in the State University, working part time in the State Capitol to supplement his GI education check.

Upon graduation, he married a public health nurse and bought a farm with an FHA loan, and then obtained an RFC loan to go into business. A baby was born in the county hospital. He bought a ranch with the aid of the veterans' land program and obtained emergency feed from the government.

Later he put part of his land in the soil bank and the payments soon paid out his farm and ranch. His father and mother lived very comfortably on the ranch on their social security and old-age assistance checks. REA lines supplied electricity. The Government helped clear his land.

The county agent showed him how to terrace it; then the Government built him a fishpond and stocked it with many fish. The Government guaranteed him a sale for his farm products at highest prices.

Books from the public library were delivered to his door. He banked money which a Government agency insured. His children grew up, entered public schools, ate free lunches, rode free school buses,

played in the public parks, swam in public pools, and joined the FFA. He owned an automobile so he favored the Federal highway program.

He signed a petition seeking Federal assistance in developing an industrial project to help the economy of his area. He was a leader in obtaining the new post office and Federal building, and went to Washington with a group to ask the Government to build a great dam costing millions so that the area could get "cheaper electricity."

He petitioned the Government to give the local air base to the county. He was also a leader in the movement to get his specific type of farming special tax writeoffs and exemptions. Of course, he belonged to several farmers' organizations, but denied that they were pressure groups.

Then one day, after hearing that the per capita income tax bill in 1959 averaged out to \$251.49 for every man, woman and child in the nation (over 177 million persons), he wrote his congressman:

"I wish to protest these excessive governmental expenditures and attendant high taxes. I believe in rugged individualism. I think people should stand on their own two feet without expecting handouts. I am opposed to all socialistic trends and I demand a return to the principles of our Constitution and the policies of State Rights."

Do you know him?

The Editor's Corner

TWO of our shop personnel in the Houston Trailer Branch Office spend their spare time indulging in a rather unique hobby. They like to catch gar fish. BILLY WHITE and JIM WEST are pictured on these pages with three of their prized catches. Their hobby not only provides them with an exciting way to spend leisure hours, but also helps rid our streams and lakes of the outlaw gar.

One of our employees is well on his way to having his own personal band. W. H. HODGES, Trailer Division employee, has four children who are already accomplished musicians, and a four-year-old boy who is just waiting his turn.

William Carrolton Hodges plays the guitar; James Harvey Hodges plays the violin; Georgia Ann Hodges plays the piano; and Alice Marie Hodges joins in with the accordion. Young Arnold Ray Hodges has his sights set on playing a mandolin when he is a little older. As he says, "then we can have a band!"

The young pianist is studying to be a Sherwood Music teacher in Chicago. Her teacher, Mrs. Annie E. Finner of

Alto, has been encouraging her and the other musicians in the family for several years.

We had a bulletin from the American Medical Association, publishers of TODAY'S HEALTH, discussing the common aspirin. We thought you might be interested to know that 16 billion aspirin tablets were swallowed by Americans in one year alone. According to this bulletin, we bought in 1959 almost 69 million dollars worth of plain aspirin and spent another 213 million for pain-killers containing aspirin in combination with other ingredients.

We quote the following from this news release: "Most family doctors think it's safe to take an aspirin or two to relieve headaches, cramps or minor aches. But if the dosage has to be repeated several times a day for several days, the doctor should be called. Never take an aspirin to reduce fever without consulting your doctor. By doing so you may be masking disease symptoms.

"Be sure to drink a full glass of water when you take aspirin and don't swallow them on an empty stomach.

Otherwise you may irritate your stomach. Since aspirin deteriorates in the bottle don't buy more than a two- or three-months supply. If the tablets in your aspirin bottle have a vinegary smell or crumble in your hands, throw them out. Don't take aspirin if you have a stomach ulcer. Aspirin's weak acid content can irritate an ulcer.

"In purchasing aspirin don't be misled by brand names and oft-heard advertising slogans. Aspirin is always aspirin no matter what you pay for it. Nevertheless, surveys show that the price of a 100-tablet bottle may vary from seven to 69 cents depending on the brand. When aspirin is combined with other ingredients in popular, over-the-counter pain and headache remedies, prices double and triple.

"One of the most widely advertised aspirin-combinations is buffered aspirin (usually twice as expensive as the plain pill). These preparations are simply aspirin with an added pinch of antacid salts. 'Fizzling' headache cures are buffered aspirin plus some citric acid to produce the bubbles.

"One of the claims for buffered aspirin is that it 'acts twice as fast as aspirin.' Another is that it 'won't upset your stomach.' Yet, three important studies failed to support these claims.

"Still another aspirin preparation contains aspirin, phenacetin and caffeine—just like a doctor's prescription.

THESE musicians are the children of Mr. and Mrs. W. H. Hodges of Wells. Mr. Hodges is a Trailer Division employee.

BILLY WHITE, left, and Jim West, Houston Trailer Branch employees, display three huge gar fish which they catch as a hobby.

SCENE at annual Cub Scout Fair. Foundry-sponsored Cub Pack 149 participated with exhibits that interested all spectators.

But remember when you buy any drug for self-medication *you're* making the prescription; it hasn't been chosen by a doctor for a specific patient with a specific need. So, don't be fooled."

PACK 149, sponsored by Lufkin Foundry and Machine Company, participated in the annual Cub Scout Fair held recently at Chambers City Park. A good crowd attended the event, and Cub Master JIM RIGGS, Trailer Division employee, reported all the boys had a wonderful time.

ONE of our favorite contributors to the FOUNDRY ROUNDUP brought us a humorous letter he received recently, which we believe will get a smile from you also. It reads as follows:

"Dear Sir, In reply to your request to send a check, I wish to inform you that the present condition of my bank account makes it almost impossible. My shattered financial condition is due to Federal Laws, State Laws, County Laws, Corporation Laws, Liquor Laws, Mothers-in-Law, Sisters-in-Law, and outlaws.

"Through these laws I am compelled to pay a business tax, head tax, school

tax, gas tax, light tax, furniture tax, and excise tax.

"I am required to get a business license, car license, operator's license, truck license, not to mention a marriage license and dog license.

"I am required to contribute to every society and organization which the genius of man is capable of bringing to life; to women's relief, the unemployment relief, the gold digger's relief, also to every hospital and charitable institution, the Salvation Army, Community Chest, Red Cross, Purple Cross, Double Cross, Boy Scouts, Girl Scouts, Cub Scouts, Y.M.C.A., Y.W.C.A., as well as way stations for Wayward Girls, Boy's Ranch and Boy's Town.

"For my own safety I am required to carry health insurance, life insurance, fire insurance, property insurance, liability insurance, burglary insurance, accident insurance, business insurance, earthquake insurance, tornado insurance, and old age insurance.

"My business is so governed that it is no easy matter to find out who owns it. I am inspected, expected, suspected, dejected, examined, re-examined, informed, required, summoned, fined, commanded and compelled, until I provide an inexhaustible supply of

money for every known need, desire or hope of the human race.

"Simply because I refuse to donate to something or other, I am boycotted, talked about, lied about, held up, held down and robbed until I am almost ruined.

"I can tell you honestly that except for a miracle that happened I could not enclose this check. The wolf that comes to many doors nowadays just had pups in my kitchen. I sold them and here is the money."

And while we're re-printing things which others have brought to us, the following was taken from a speech by General Douglas MacArthur on his 75th birthday, and was brought to us by one of our retired employees:

"Youth is not entirely a time of life; it is a state of mind. It is not wholly a matter of ripe cheeks. It is a temper of the will, a quality of the imagination, a vigor of the emotions, a freshness of the deep springs of life. It means a temperamental predominance of course over timidity, of an appetite for adventure over love of ease. Nobody grows old by merely living a number of years.

"People grow old only by deserting their ideals. Years may wrinkle the skin, but to give up interest wrinkles the soul. Worry, doubt, self-distrust, fear and despair—these are the long, long years that bow the head and turn the growing spirit back to dust.

"Whatever your years, there is in every being's heart the love of wonder, the undaunted challenge of events, the unfailing child-like appetite for what next, and the joy and the game of life. You are as young as your faith, as old as your doubt; as young as your self-confidence, as old as your fear; as young as your hope, as old as your despair.

"In the central place of every heart there is a recording chamber; so long as it receives messages of beauty, hope, cheer and courage, so long are you young. When the wires are all down and your heart is covered with the snows of pessimism and the ice of cynicism, then, and then only are you grown old."

Summer time is here, and Lufkin folks are taking to the streams and rivers and parks. We'd like to have some of your pictures of the picnic, the skiing party, swimming, fishing, backyard cook-outs, or whatever you may be doing in family or with friends. Bring or mail your snapshots, together with the identification, to THE FOUNDRY ROUNDUP. We'll return them when we've finished with them.

The Hobby Corner

JAMES OATES, Welding Shop employee, is not afraid to think new ideas even to the point of following uncharted ways. The fact that Lufkin Foundry has been producing pumping units with an equalizer for many years did not daunt or dampen his courage to attempt to build a unit without an equalizer. And that's exactly what he did!

Although it is a model unit, it works perfectly. And it has received much attention not only from his fellow workers but also from his foreman and the Engineering Department.

James says his desire to build a model unit had its beginning some two years back when he was recovering from an illness, and was told that he should take up some sort of hobby. He did not care for fishing or hunting, and he really had no idea about what he should do to occupy his spare moments.

While visiting in Dallas, he was shopping in a department store when he happened to see a drafting set, which he promptly bought. For awhile he occupied himself with house plans, landscaping plots for a cemetery, and other things. Then his natural curiosity about his job at the Foundry as a welder caused him to try to find the answer for several "whys" he was asking.

Thus, some three months ago he decided to redesign a pumping unit

without an equalizer. He drew on his board at home each piece of the unit, using one inch to the foot of the pumping units on which he worked each night. His wasn't to be flimsy, makeshift sort of model; to please his perfectionist nature, he fabricated each piece of the model unit from metal. He got some small pieces of scrap from the shop which he worked on during his supper hours. On Saturdays, he worked in the Ag Shop at the school in Huntington. The I beams, H beams, and strips were cut and welded together at scale size. The ladder is made of welding rods. He wanted to use roller bearings in all the working parts, but discovered they would cost him about \$32, so he compromised by using bushings instead.

"I suppose I have been out a total of \$2 on the unit," he remarked.

James has been with Lufkin Foundry for 11 years. He states that building this model unit has helped him tremendously in his job. "I can appreciate better what I do each night as a welder for the Company; I certainly take more pride in my work. It also has been very educational, for I know so much more about the product which our Company manufactures," he said.

He is most interested in the new Mark II unit which the Company is now building, and he would like to make a scale model of it. He spends

JAMES OATES, welder, stands beside his scale model unit which he built during his spare time. The remarkable feature of this model is that it has no equalizer.

his supper hours looking over the completed unit in the Assembly and Shipping Department.

His inventive genius is not limited to pumping units. At his home in Huntington, he has built a table vibrator.

"It will really shake the kinks out of a person, too," he says with a smile.

For James, second shift welder, this may be just the beginning of something really worthwhile for him.

TOM DUKE, Machine Shop employee, has built him a "bicycle boat" to be used on a lake when he goes casting. He designed it himself, then built it from quarter inch plywood and fiberglass. He used a bicycle sprocket and chain, and put two wheels with six paddles each on a shaft. The seat will hold two people comfortably, and there's a fender on the back to keep the water from splashing on the riders.

A pole beside the seat operates the rudder which determines the direction in which the boat goes. It's quite a handy gadget, and he's already put it to use. He says he caught a big string of bream recently.

(Editor's Note: We are happy to have these stories about hobbies of employees. If you have a hobby, we'll be glad to write a story about it. Just contact the Editor in the Personnel Building.)

GARY FROST, 13, grandson of Tom Duke, propels the "bicycle" boat across the lake at about six miles per hour.

TOM DUKE, machinist, sits on his "bicycle boat" which he built for lake fishing.

Chicken Economics

Once upon a time there was a farmer who raised two chickens, took them to the city and sold them to a factory worker, then bought two shirts with the proceeds.

So the farmer had two shirts and the city worker had two chickens.

Later, the local "liberal" politico told the farmer he could get more money for his chickens by making them scarcer.

He also told the worker that he should work fewer hours and get more for his labor.

So next time the farmer brought only one chicken to market. He got as much money for the one chicken as he formerly got for two.

But when he went to buy shirts, he found that the price had doubled, so he got only one shirt.

Now the farmer has one shirt and the laborer one chicken, whereas if they hadn't listened to the politico-economist—but had produced as they knew how—they would both have twice as much.

Thus endeth our little lesson in basic economics.

Our thanks to S. D. Warren Co. for the text and 76 Magazine for the art

Raymond A. Wolford	Apr. 30, 1956	5
H. J. Bantz	Apr. 2, 1958	3

"You can always tell when a man's well informed. His views are pretty much like your own."

It takes over 3,000 bolts to hold an automobile together and only one nut to scatter it all over the landscape.

At age 20 we don't care what the world thinks of us. At 30 we begin to worry what it thinks of us. At 50 we find it wasn't thinking of us at all.

When the gentleman from Texas was joining the church, the minister asked him if he knew where Jesus Christ was born.

The Texan replied: "Fort Worth, wasn't it?"

"No," answered the minister. "It was in Palestine."

"Well," said the Texan, "I knew it was somewhere in Texas!"

"Mrs. Smith, did you say in front of my little girl that I was a great rusty cat?"

"No, Mrs. Jones. I said you were a great aristocrat."

A clergyman, spending his vacation in the country, was out walking with two of the farmer's daughters. They stopped to admire the beauties of a little stream. An angler passing by said, "Catch anything?"

"Sir," replied the clergyman with dignity, "I'm a fisher of men."

"Well," said the fisherman, glancing admiringly at the girls, "you sure have the right bait."

"I think you might talk to me while I knit," sighed wife.

"And why don't you knit to me while I read?" suggested her better half.

The cop noticed a man coming down the street in a barrel.

"Look here, fellow," the officer said, "what's the idea of the barrel? Are you a poker player?"

"No sir," the man replied. "But I just spent a couple of hours with some guys who are."

"Congratulations, my boy! You will always look upon this as the happiest day of your life."

"But I'm not getting married until tomorrow."

"Yes, I know."

Instructor: "Do you wish to learn to play golf, madam?"

Lady: "Oh, heavens, no. It's my friend here who wants to learn; I learned yesterday."

"If there is anyone in the congregation who likes sin, let him stand up and—what's this, Sister Martha, you like sin?"

"Oh, pardon me, I thought you said gin."

He: "Darling, how can I ever leave thee?"

She: "By train, bus, street car or taxi."

Farm boy: "How do you get a girl to marry you, Reuben?"

Reuben: "Wal, if she don't want to, you can't. But if she does, there ain't hardly no way to prevent it."

"I just got out of prison this morning," a traveler told a man on the train. "It's going to be tough, facing old friends."

"I can sympathize with you," commiserated the other. "I'm just getting home from the legislature."

A Texan had a small farm with just a few sheep. One day his wife was dyeing some bedspreads blue and a little lamb fell into the bucket of dye. A passing motorist saw the lamb with the blue fleece and bought it for \$50. So the Texan figured he had a good thing going and colored more lambs which brought big profits.

"Pretty soon," he recalled, "I was coloring them pink, blue, yellow, green, lavender and you know—now I'm the biggest lamb dyer in Texas."

Intern in Emergency Room: "Are you married?"

Patient: "No, I was just run over by a car!"

Professor: "Miss Jenkins, what happens when a body is immersed in water?"

Miss Jenkins: "Well, usually the telephone rings."

A machinist's wife trailed him to his favorite tavern. Standing at the rear bar next to him, she ordered a

slug of bourbon. Tasting it, she made a wry face.

"How can you drink that awful stuff?" she asked.

"See, honey," he said exultingly, "and all these years you thought I was having a good time!"

Teacher: "What is the meaning of the word matrimony?"

Little Johnny: "Dad says it isn't a word. It's a sentence."

A Dallas paper reported recently that the wife of one of Texas' wealthiest oil men lost control of her car and smashed into ten others before she could come to a halt. No law suits—it happened in her own garage!

Jane was six years old. "Mama," she said, "if I get married will I have a husband like Pa?"

"Yes," replied the mother with a smile.

"And if I don't get married will I have to be an old maid like Aunte Kate?"

"Yes."

"Mama," after a pause, "it's a tough world on us women."
