

The Foundry Roundup

OCTOBER, 1961

A SHOT IN THE ARM...

Left to right: J. T. MODISETTE, Pattern Shop, TOM EDD WILSON and HAROLD DONEY, both of the Foundry, followed the nurse's admonition to "smile" for their shots. JOAN GRIFFIN, Personnel Department, helped keep the needles sterile.

SOME 635 employees of Lufkin Foundry & Machine Company got a head start last month toward the annual battle between man and the winter weather. These employees took the "flu" vaccine furnished without charge by the Company and given by Mrs. Martha Hopson, Industrial Nurse. She was assisted by Mrs. Joan Griffin, Personnel Department.

In the course of five days 635 shots were administered. Of this total, 98 were in the Trailer Division; 168 in the Foundry and Pattern Shop; 71 in the Welding Shop and Assembly and Shipping Departments; 191 in the Machine Shop; and 107 to the office personnel.

This represents about 63.5% of the total employees in Lufkin.

During the hours the shots were scheduled, there were times when an average of almost two shots a minute were being given.

It is hoped this vaccine will help prevent a repetition of the influenza epidemic of last year, and the large absenteeism which resulted.

The second and final round of shots will be given during the first week in December. Since the prescribed amount of the vaccine is given in two doses, only those who took the first shot will be given this second shot.

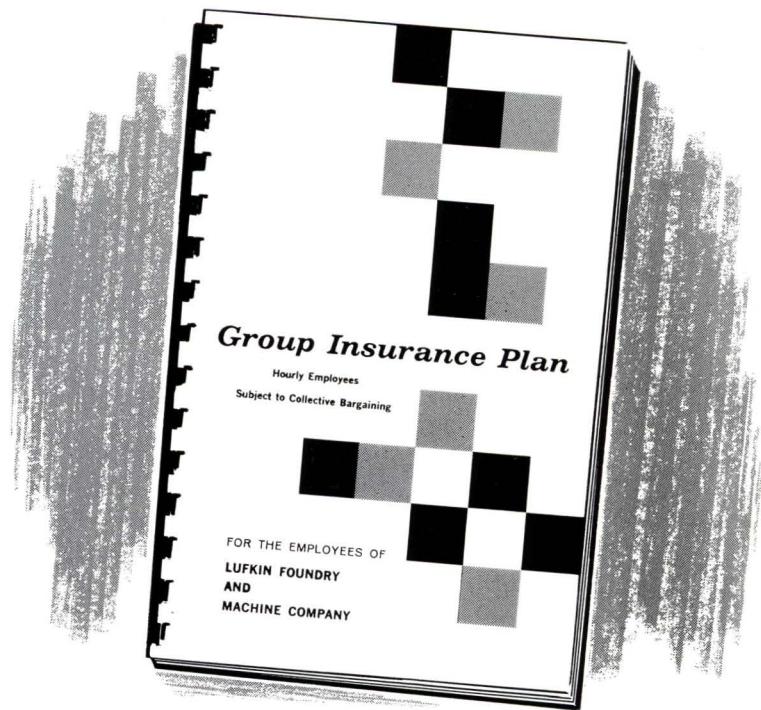

ERNEST LORD, left, Pattern Shop, and **WILLIE BREWER**, center, Foundry Department, were among the 168 persons in these departments who took the "flu" shots.

COKE DeLaFOSSE, left, Utility Maintenance, decides not to watch as **NURSE HOPSON** applies the needle. Waiting his turn is **LESTER GLAZE**, Trailer Division.

Some Changes Have Been Made...

EFFECTIVE October 20, 1961, the Aetna Life Insurance Coverage and Weekly Benefits for all hourly paid employees subject to the bargaining unit and all foremen, guards, and plant clerks who are hourly paid but who are not subject to the bargaining unit at Lufkin Foundry and Machine Company was transferred to a new insurance carrier.

The Tennessee Life Insurance Company of Houston, Texas, will provide these coverages, beginning that date. A Certificate Booklet providing this coverage has been issued to the above named employees.

There is no change in the overall coverage and benefits that these employees have had. It is merely a change in insurance carriers. The hospitalization coverage will remain with the Aetna Life Insurance Company, and each employee will retain his old Aetna Certificate to serve as his hospitalization certificate.

There has been no change in salaried employees insurance; both the life insurance and hospitalization insurance still will be carried by Aetna Life Insurance Company.

Any current employee who has been employed with Lufkin Foundry and Machine Company for one year is eligible to participate in a \$1,000 Life Insurance Plan written by the Tennessee Life Insurance Company, of which the Lufkin Foundry will pay

one-half the cost of premiums for this policy. This policy is for \$1,000 Natural Death, \$2,000 for Accidental Death, and contains the Premium Waiver clause in the event of total and permanent disability. Each policy contains cash values and is retained by the employee should his service with the company be terminated.

Lufkin Foundry and Machine Company does not retain control over this policy in any manner, other than to deduct the employee's portion of the

premium and to furnish the other half of the premium. This is merely another way in which the Company expresses its appreciation to employees.

If any eligible employee is interested in this policy, he may contact Mrs. Jeffie Burch, 317 Perry Building, who is the local manager of the Tennessee Life Insurance Company.

For information regarding insurance, employees are invited to contact Joe Perkins, insurance officer, in the Personnel Department.

PERSONNEL Department employees prepared for distribution some 900 insurance booklets regarding the change. Left to right: JOAN GRIFFIN, JOE PERKINS, MARTHA HOPSON.

Shades of the Past

(EDITOR'S NOTE: The picture on this page was brought in by Lee Deggs, Machine Shop, which recalled a fishing trip made by four Lufkin Foundry and Machine Company employees many years ago. Guy Croom, Plant Superintendent, wrote the following article describing the time and circumstances surrounding the taking of this picture.)

THIS picture was taken in the fall of 1923. Reading in the usual order are L. L. (Luke) Parrish, Toni Gibson (deceased), Lee Deggs, and Guy Croom.

The four of us were working the night shift. Normally, we started work at 5:30 p.m., this being the time the day shift had finished their 10 hours. We got in our 12 hours by 6:30 a.m., taking off 30 minutes for lunch from 12 midnight until 12:30 a.m. and there were no coffee breaks and no making coffee on the job.

The night shift by working 12 hours were able to get in their 60 hours per week in five days so we didn't have to work Saturday and Sunday nights. On Saturday mornings the Company allowed us to quit an hour early at 5:30 a.m. but paid us for a full 12-hour night. You can readily see that we had quite a bit of time off: 5:30 a.m. Saturday to 5:30 p.m. Monday.

On this particular Saturday after having "washed up" and changed clothes we had our breakfast at the Ruby Cafe.

We then set sail for Townsend Slough, the other side of Ora, in Tom Gibson's T-Model Ford. This car was capable of making 40 miles per hour on a good road . . . but there were no good roads!

Results of the trip are self-evident. The fact that we got back before dark is also obvious, because poor folks them days didn't have flash light cameras.

Observations around the Plant ...

R. O. PALMORE disappointed that his friend SLIM RITCHIE wouldn't cooperate in a move to send flowers while he was in the hospital.

JAKE ROSS says grandpas don't get fed up with grandchildren's antics.

CORRY JONES is proud of his Moscow heritage. BOB BUTLER passing out cigars celebrating arrival of new grandson . . . Bob Butler the third, probably.

At church, Blacksmith HUGHES asked ED WINSTON if he didn't take a dollar out of the collection plate instead of making a contribution.

REECE WISDOM, new employee in Structural Shop, works on second shift in paint booth . . . every indication of being our sort of cloth. Meet FRANKLIN ARNOLD, new man in Machine Shop. Has worked here before; let us hope we are mutual in his staying this time.

ERTIS BROCK often asks about John Cluck. JOE BYNUM doing his bit to help America meet Mr. K's bluff. JULIUS COLLMORGEN happy about an unusually fine year for cattle raising. Some people think PETE COONEY is grouchy . . . but he ain't.

WILLIAM COUNTS knows the answers about our inventory of finished structural parts. CHARLES DANIEL finally got the traffic aisle moved over in front of his machine. LOUIS DENMAN doesn't have to quit work in order to talk to you . . . good talker, too.

REID GADDY fed up with buying cokes for SAM GANDY. We offer our condolences to RED GANDY in the loss of his sister. You have to keep hustling if you keep up with LEE GIBBS. If you don't believe it, ask JIMMY TROUT.

CHARLIE HARBUCK raised more corn than he can get gathered. JOHN HOPKINS worked so long at night people thought he was a new employee when he went to work on the day shift.

MRS. JOY BILLINGSLEY, switch-board operator, took one of our upper bracket tours of the Plant . . . wanted to see where telephones were located, especially the ones that give her the most trouble.

BILL LOVE, a past master with a kettle drum, is now concentrating on the art of making fine coffee. GENE PERKINS thinks he is going to have the best fall garden of anybody in the shop.

SANDRA VARGA is a new employee in the Order Department. Her husband, JOE VARGA, works in Engineering Department.

WILLIE WADE joined up with the Foundry Department. The Wades are at home at 3307 Paul Avenue with their two children. COY MINSHEW aligned himself with the Welding Shop . . . lives at Apple Springs and has one child.

CHARLOTTE BLACKERBY has a desk in the Accounting Department and has her lodging at Keltys . . . the lucky man has not made his claim yet.

Engineering Department lays claim to ROBERT ESTES who finds his way to 606 Grove every evening where he and his wife live. BARBARA ROOT is doing chores in Material Control. She lives at 202 East Menefee with her parents. Some of you single boys ought to find out her telephone number.

CLIFFORD TREVATHAN's wife, MAUDELLIA, now makes her way each morning to the Material Control office. They live on Card Drive with their three children.

Mill Supplies Division annexed MARION BULLARD who is a former employee of the Gas Engine Department. She gets her mail at 1406 Sue Drive where she divides time with her four children.

DANIEL W. MARTIN gets his pay check from work in the Engineering Department. He's the son of DAN MARTIN, Material Control.

WILLIAM BEATY bends his efforts to please BENNIE WALLACE in the Structural shop on the second shift. Gets his rest on Route 5; girls haven't been successful in roping him.

JAMES W. NICHOLS is allied with the Foundry Department, lives at 1712 Paul and has one child. GERALD WAYNE DUNCAN earns his livelihood in the Machine Shop, is single and makes his home with his father on Route 4.

BOBBY JOE WOOD also lives on Route 4, is a new employee in the Machine Shop, and is single . . . there ain't no girls out there.

DOUG HUTTO returned to the Trailer Division engineering department after being away for a little more than a year getting some college work off in Houston.

OSCAR HIGHTOWER is a help in meeting the daily schedule in the Structural Shop. He's single and lives on Route 3. BOBBY G. WILLIAMS is one of Sam Gandy's disciples, helping to keep the buggars away.

JOHN LEE HOPKINS, well known among Lufkin bowlers, is now working for Lufkin Foundry in the Accounting Department.

CHARLES BROOKSHIRE is part of the Machine Shop crew . . . is originally from Etoile.

JURL D. HEATON is another diadem in the galaxie of shining stars in the Mill Supplies division. He's married, has one child and lives on Route 3.

TOM TREADWELL and JACK BROOKS wonder why Guy CROOM won't sit in CHARLIE GAULT'S chair?

Fatigue is something that comes on around 7 a.m. Monday.

The only exercise some people get is jumping to conclusions, running down friends, sidestepping responsibility and pushing their luck.

LESSON IN AMERICAN CITIZENSHIP

GOVERNMENT in the United States of America is based upon the Declaration of Independence, the Constitution and the Bill of Rights. A thorough knowledge of, and allegiance to, the principles set forth therein is essential to the preservation of life, liberty and property. With that knowledge comes an understanding that under our Constitutional Republic there are duties and responsibilities which must be voluntarily assumed and faithfully discharged by each American citizen. As his first responsibility each American citizen must know:

1. That our Government is based upon a belief in God and that all men are Created equal—not made so by government; that all men are endowed by God with certain unalienable rights, including life, liberty and the pursuit of happiness; that our Government was instituted to make these rights secure, deriving its just powers from the consent of the governed.

2. That our Federal Government has only those delegated powers expressly granted to it—that all other powers

are reserved to the State, or to the people, and may not be denied or disparaged by those granted.

3. That the power granted to the legislative, judicial and executive branches are separate and distinct—each from the other and were expressly so divided to insure that we have a government of laws and not one of men.

4. That the President of the United States must be a citizen born in this country, at least 35 years of age, and a resident thereof for at least 14 years; that before he may take office he is required to take the following oath or affirmation: "I do solemnly swear (or affirm) that I will faithfully execute the office of President of the United States, and will to the best of my ability, preserve, protect and defend the Constitution of the United States."

5. That the Constitution, the laws made pursuant thereto, and treaties made with the approval of two-thirds of the Senate "shall be the supreme law of the land."

6. That treason against the United States consists not only in levying war against them but also "in adhering to their Enemies, giving them Aid and Comfort."

7. That "The United States shall guarantee to every State in this Union a Republican Form of Government."

8. That the Constitution may be amended by two-thirds of both the House of Representatives and the Senate or on the application of the Legislatures of two-thirds of the States when ratified by the Legislatures of three-fourths of the States.

9. That within the confines of powers expressly granted the Federal Government was created for the following purposes:

- a. To form a more perfect union,
- b. to establish Justice,
- c. insure domestic Tranquillity,
- d. provide for the common defense,
- e. promote the general Welfare; and
- f. secure the Blessings of Liberty to ourselves and our Posterity.

10. It, therefore, becomes our bounden duty to give meaning to our form of Government by letting our elected and appointed officials, Senators and Representatives know whenever any act or action, either accomplished or proposed, does not square with the beliefs and Constitutional provisions above set forth.

The Editor's Corner

PERHAPS the story of the month might be labeled "Big Game Hunt." From all accounts that's what several of our employees went on in early October. Going to Glendo, Wyoming, were Mutt Barr and Jim Odom, Machine Shop, and Dude Schuller, Trailer Division. Also in the party were Perry Schuller, Jim Bob Odom, A. Boone and H. N. Truitt. They killed 11 deer and one teddy bear.

One report on the teddy bear was that the little black bear got to chasing Mutt Barr around the camp and Dude Schuller had to kill it. Another account of the episode was that when the men came back late one evening from a deer hunt, the teddy bear was playing with a little girl whose father owned the camp where the men were staying. When the bear saw all the rugged hunters, he headed for the nearest tree. Dude thought it was a big black grizzly and feared for the child's life. He grabbed his rifle and fired away.

We might add that these two tales come from members of the hunting party other than Dude. Perhaps his story might be different!

TEXANS just naturally tell tall tales, but the picture on these pages of a super squash is not one of the usually big stories. It is a fact. Grown by Roy Stone near Garrison, Texas, the squash was given to PERRY BOOSE, cleaning department of the

PERRY BOOSE and TOMMIE TUTT
... enough squash for a banquet

Foundry. He and TOMMIE TUTT, chipping department of the Foundry, brought it in for the snapshot. It weighed 14½ pounds and was 39¼ inches long.

We read a little story the other day which we think worth passing on. "When God made the oyster, He guaranteed him absolute economic and social security. He built the oyster a house, a shell to protect him from his enemies. When hungry, the oyster simply opens his shell and food rushes in for him.

"But when God made the eagle, He said, 'The blue sky is the limit. Build your own house.' So the eagle built on the highest mountain crag where storms threaten every day. For food, he flies through miles of rain and snow and wind.

"The eagle, not the oyster, is the emblem of America."

E. E. KIRKLAND, Machine Shop, has received the news that his son, David E. Kirkland, USN, is scheduled to be promoted to aviation metalsmith second class November 16, while serving with the Navy's Antarctic Squadron, Air Development Squadron Six (VX-6), at the Naval Facility, McMurdo, Antarctica.

VX-6 is the Navy's air arm of Operation Deep Freeze, the code name given the U. S. Navy support to science in the Antarctic. Here the U. S. operates four scientific stations where scientists and navy men alike work 24 hours around the clock uncovering the mysteries of the Frozen Continent.

The squadron normally deploys to the Antarctic from Quonset Point, R. I., in the fall of each year and actually operates on the continent from September through March.

David who entered the squadron in 1960, will be promoted as a result of the high score he attained during the navy-wide competitive written exams held last August.

CLIFTON DEAL, Utility Maintenance, brought us some pictures showing the fishing prowess of his son, TOMMY. Clifton thought he had caught a whopper when he landed a 4¼-pound bass. But then his son latched onto a 4¾-pound bass. Next day, the boy caught a 5½-pound bass which won him a steak dinner for catching the biggest bass during the week at Dam B.

GREGORY EARL . . . a pensive look

And while we're speaking of fish, we have a picture of a fine boy displaying the one caught by his grandmother. DAVE BURNETTE, son of B. C. BURNETT, Lufkin's sales representative in Lafayette, Louisiana, is shown on these pages with a 6-pound, 3-ounce Opelousas catfish which was caught by MRS. JOE BURNETTE, wife of JOE BURNETTE, yard-crew foreman, at Dam B. She caught the big fish on a cane pole with the hook baited with a shiner. That was some sport landing that fish!

DIBOLL THOMPSON, Trailer Division, sent us a picture of his and Mrs. Thompson's pride and joy . . . their five-month-old grandson, Gregory Earl, who is the son of Mr. and Mrs. H. E. Fagan of Redwater, Texas.

There's an old saying which is not very wise but is a common practice among many of us: "Don't do today what you can put off until tomorrow."

Lufkin Foundry employees are urged not to wait until the end of December to submit their claims for personal medical expenses under the deductible part of their Hospital-Medical insurance plan.

By waiting until the last month in the year, employees may face a delay

DAVE BURNETTE and a big Op

THIS mule deer, killed by JIM BOB ODOM, weighed 200 pounds, had 11 points. It was shot at the foot of Laramie Mountain

A SEQUENCE shot: DEAL with a 4 1/4 pound bass, and TOMMY with his 4 3/4-pound and 5 1/2-pound bass

in receiving reimbursement because of the processing load of many claims submitted at one time.

At any time an employee or an employee's dependent has in excess of \$50 in medical expense per calendar year for treatment of a disease or injury, the insurance company will reimburse that employee for 80% of this expense up to a maximum of \$10,000 or not more than \$5,000 in any one year.

Even though a claim has been filed for reimbursement earlier this year, a second—or even a third—claim can be submitted during 1961 should additional expenses occur.

Doctor's bills or receipts showing date of treatment, nature of treatment, and charges for each treatment (not canceled checks), prescription receipts, and other clear evidence of charges paid and the individual for whom the charges are made should be brought to the Insurance Office in the Personnel Department to be attached to the claim.

Any question regarding your insurance claims will be answered by Joe Perkins, Insurance Officer.

Former President Dwight D. Eisenhower says Americans are a courageous people. But he adds that many are not acting like it in this time of crisis.

"I deplore the amount of uneasiness and fear we express," he said. "We are a vibrant and courageous people, and I see no reason why we should put our heads down weeping all the time."

Asked about his suggestions to overcome fear, the former chief executive said: "I think we have to look at ourselves, at our own hearts and our own courage, and not give way just because some bully is threatening. Let's go ahead with courageous and useful lives and not wait for fate to overtake us."

Behind every successful man there's a woman who keeps telling him he's wrong.

The newly rich woman was trying to make an impression. "I clean my diamonds with ammonia, my rubies with wine, my emeralds with brandy, and my sapphires with fresh milk."

A quiet lady sitting next to her looked up and said, "I don't clean mine. When they get dirty, I just throw them away."

If you can't hear a pin drop, ten to one there's something wrong with your bowling.

A tourist stopped where a farmer was erecting a building and asked, "what are you building?"

"Wal," answered the farmer. "If'n I can rent it, it's a rustic cottage; if'n I can't, it's a cow shed."

An Eastern guest at a dude ranch was fascinated in watching a cowboy prepare himself a smoke.

"It's wonderful," he finally remarked, "the way you can roll your own cigarette with one hand."

"Tain't nothin'," the cowboy responded. "Gettin' the filter in is the hard part."

A talkative relative of a pre-teen boy had not visited them for some time and greeted the boy with standard: "Why the last time I saw you, you were only so high!"

"Yes," the lad agreed, "and you were only so wide."

Wife: "Four years ago my husband went to get some steak sauce and

never returned. What should I do?"

Marriage Counselor: "Try tomato catsup."

The wife was crying at her daughter's wedding. Her husband consoled her with the following: "Don't think of it as losing a daughter. Think of it as gaining a bathroom."

It was his first day back on the job after vacation.

"How was your trip?" asked a fellow worker.

"Well," sighed the weary traveler, "have you ever spent two weeks in a station wagon with those you thought you loved best?"

"How do you like your new baby sister, Tommy?"

"Oh, she's all right, I guess, but just like Pop says, there are lots of things we needed worse."

It's difficult to look spic if you have too much span.

Bentley loved the good things in life. So when an uncle, who was old and stingy, left him a sizeable sum, Bentley wrote friends the news in these words: "Yesterday at five in the morning my uncle and I passed on to a better life."

The weary husband was met at the door with sad news.

"We'll have to go out to dinner," his wife said cheerily, "I couldn't fix anything because the electricity went off."

"But we have a gas stove," the husband growled.

"I know," the wife went on, "but we have an electric can opener."

Two welders walked into a rustically decorated bar where the first thing they saw was a moose head hanging over the bar. Amazed, one turned to the other and exclaimed, "Man, that animal must have been going pretty fast when he hit the other side of the wall."

A refugee couple arrived in the United States. Through much red tape and years of study they were finally

made citizens. The husband rushed into the kitchen with the long-awaited news. "Anna! Anna!" he shouted, "at last, we're Americans!"

"Fine," replied the wife. "Now you wash the dishes."

"My father and I know everything in the world," bragged the 10-year-old.

"All right, where's Asia?" questioned his friend.

"That's one of the things my father knows."

Wife: "Do you have a good memory for faces?"

Husband: "Of course I have."

Wife: "That's good. I just dropped your shaving mirror."

"Johnny," said the preacher, "every time I hear you swear, a cold chill runs down my back."

"Gee!" answered Johnny, "If you had been at our house the other day when dad caught his finger in the door, you'd have frozen to death!"
